PROTECT THE PEOPLE

MSAFE
PROTECT THE PEOPLE

BUILT STRONG. BUILT SAFE.

At MSAFE, safety is more than a priority, it's the foundation of everything we create. We believe that true safety should be inherent in every product and service we offer.

Our scaffolding systems are meticulously engineered using high-grade aluminium alloys and advanced TIG (Tungsten Inert Gas) welding technology, ensuring unmatched strength, durability, and reliability.

Led by a team of skilled professionals, MSAFE is dedicated to delivering quality products and responsive customer service, consistently meeting the evolving needs of our clients with precision and commitment.

Our Quality Management System (QMS) is ISO 9001:2015 certified, and our products are fully compliant with EN 1004 standards. We take pride in offering CE-certified scaffolding solutions that uphold the highest international standards of safety, performance, and trust.

MSAFE
PROTECT THE PEOPLE

Reach Higher. Work Smarter. Work with Confidence.

Aluminium Scaffoldings

Msafe is a versatile range of mobile aluminium scaffolding solutions designed to make working at height safer, more comfortable and more convenient.

Whether the job demands frequent climbing, extra reach, access to narrow spaces or larger working platforms, Msafe Fit offers purpose-built scaffolding solutions to suit diverse work environments.

- ☑ **Built for Safety**
- ☑ **Comfortable Access**
- ☑ **Modular & Versatile**
- ☑ **Mobile Convenience**
- ☑ **Solutions for Every Space**
- ☑ **Trusted Across Projects**

MSAFE
PROTECT THE PEOPLE

ONE RANGE. MULTIPLE SOLUTIONS.

Stairway Scaffolding
A comfortable mobile scaffolding solution designed for frequent climbing and descent. Its wide entry and anti-slip stairway make access to the work area convenient and secure.

Narrow Scaffolding
Designed for narrow and difficult-to-access work areas, this compact solution helps professionals reach spaces where conventional scaffolding may not be practical.

Extra Reach Scaffolding
When the job needs to go higher, the Extra Reach version provides a modular solution for accessing elevated work areas while maintaining the convenience of a mobile tower.

Bridge Scaffolding
Ideal for larger working platforms and applications where work needs to be carried across obstructions. A practical solution for demanding work environments.

Cantilever Solutions
For areas that cannot be reached through straight access, cantilever sections provide additional access to horizontally outward areas.

Podium Indoor Solution
A practical access solution for indoor applications where convenient and controlled working-at-height access is required.

FRP & Aluminium Ladders

Safe. Strong. Durable.

At MSAFE, safety is more than a priority, it's the foundation of everything we create. We believe that true safety should be inherent in every product and service we offer.

Our FRP and Aluminium Ladders are robustly engineered for demanding industrial applications, manufactured using premium-grade materials and precision construction techniques to deliver exceptional strength, stability, and long-lasting performance. Designed to withstand harsh working conditions, they ensure superior safety, reliability, and durability across a wide range of professional and industrial environments.

Led by a team of skilled professionals, MSAFE is dedicated to delivering quality products and responsive customer service, consistently meeting the evolving needs of our clients with precision and commitment.

Our Quality Management System (QMS) is ISO 9001:2015 certified, and our products are fully compliant with EN131 standards. We take pride in offering CE-certified scaffolding solutions that uphold the highest international standards of safety, performance, and trust.

Engineered for Heights that meet the Horizon.

MSAFE
PROTECT THE PEOPLE

Every Connection Counts.

A scaffold is only as strong as the components that hold it together.

SteelSafe offers a comprehensive range of MS Scaffolding designed to support the safety, stability and functionality of modern scaffolding systems. From secure connections and structural support to anchoring and mobility, every component plays an important role in creating a reliable working platform.

Built for demanding construction and industrial environments, our range of scaffolding fittings is designed to complement Cuplock and conventional scaffolding assemblies with dependable performance and practical versatility.

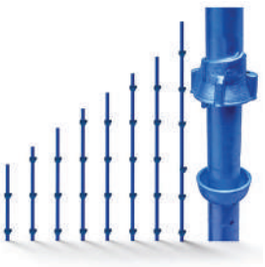
Complete The Structure. Confidently.

Every scaffolding project has different structural and operational requirements. That is Why SteelSafe brings together a complete range of essential accessories to help create secure, stable and efficient scaffold assemblies.

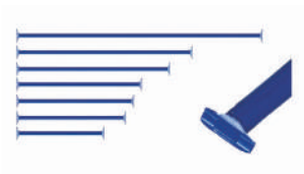
STEELSAFE
STRENGTH AND SAFETY

Our Range Includes

Cuplock / Vertical / Standard



Ledger / Horizontal



Base Jack

U Jack

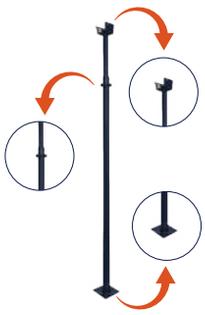
Spigot / Joint Pin

Walkway Plank

MS Chali (Grating)

Toe Guard

Adjustable Prop Jack



Forged Fixed Clamp

Forged Swivel Clamp

Tie Rod / Anchornut

The Small Components Behind A Stronger Structure.

When it comes to scaffolding, reliability is not defined by the main structure alone. It is also determined by every clamp, coupler, nut, rod and fitting working together.

With a comprehensive portfolio of scaffolding accessories, SteelSafe helps ensure that every essential connection is covered.

MSAFE
PROTECT THE PEOPLE

High Quality Aluminum Ringlock System

LIGHTER TO HANDLE. FASTER TO BUILD. STRONGER IN PERFORMANCE.

The MSafe Aluminum Ringlock System is a high-performance scaffolding solution that combines the strength and durability of aluminium with a fast, secure and versatile Ringlock connection system.

Its innovative rosette connection allows multiple configurations, making it ideal for complex structures, elevated work platforms and demanding construction applications.

With easy handling, faster erection, reduced transportation weight and built-in safety, MSafe Aluminum Ringlock helps you work smarter, safer and more efficiently.

Our Product Range

Aluminium Ringlock Ledger with Aluminium Accessories

1.5M
Thickness: 3mm
Diameter: 48.3mm
Grade: 6082-T6

1.2M
Length: 1.5m
Thickness: 3mm
Diameter: 48.3mm
Grade: 6082-T6

Aluminium Ringlock Vertical 3M without spigot

Length: 3m
Thickness: 3-4mm
Diameter: 48.3mm
Grade: 6082-T6

Aluminium Hollow Screw Base Jack 500mm

Length: 500m
Width: 150mm x 150mm
Thickness: 5mm
Grade: 6082-T6

Aluminium Ringlock Diagonal Brace with Aluminium Accessories

1.5 x 2.0 M
Length: 1500m
Thickness: 3mm
Diameter: 48.3mm
Grade: 6082-T6

1.2 x 2.0 M
Length: 2000m
Thickness: 3mm
Diameter: 48.3mm
Grade: 6082-T6

Spigot with Bolt & Nut 3 9 x 5 x 295mm

Length: 295mm
Thickness: 5mm
Diameter: 39mm
Grade: 6082-T6

Full Aluminium Hatch Plank 530 x 1500mm without ladder

Length: 1500m
Width: 530mm

Aluminium Ringlock Ledger with MS Accessories 1.5M / 1.2M

Aluminium Ringlock Diagonal Brace with MS Accessories 1.5 x 2.0M / 1.2 x 2.0M

M1

Aluminium Formwork

M1 Aluminium Formwork offers advanced formwork solutions that redefine efficiency in construction. Our systems are lightweight, durable and precisely engineered to deliver faster build times and consistent structural quality.

We develop detailed, pre-engineered 2D/3D Formwork models for every project, enabling our clients to gain a clear and comprehensive understanding of the structure before execution begins.

These models allow for a complete virtual walkthrough of the assembly prior to installation, enabling early identification of potential errors or missing components. By resolving issues in advance, we help prevent on-site delays and ensure a smoother, more efficient construction process.

M1 stands for reliability, innovation and performance on every site.

High Grade 6061 T6 Aluminium Alloy

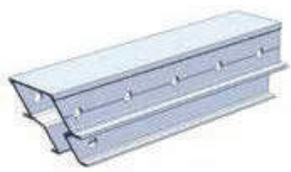
Load Carrying Capacity - 60 KN/m2

Re-usability upto 300 times

Average weight 18-22 kgs/sqm

Wall Panel
Standard Size - 2400 x 600mm

Deck Panel
Standard Size - 2400 x 600mm

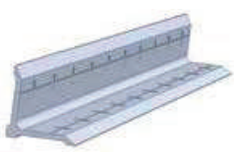


End Beam
Used to join the prop head and slab corner, the end beam supports the slab panels.

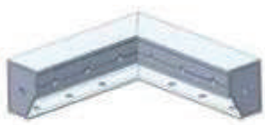
Deck Prop Head
Standard Size - 2400 x 600mm

Corner External
The SC component forms the horizontal external corner between wall/beam face and slab face.

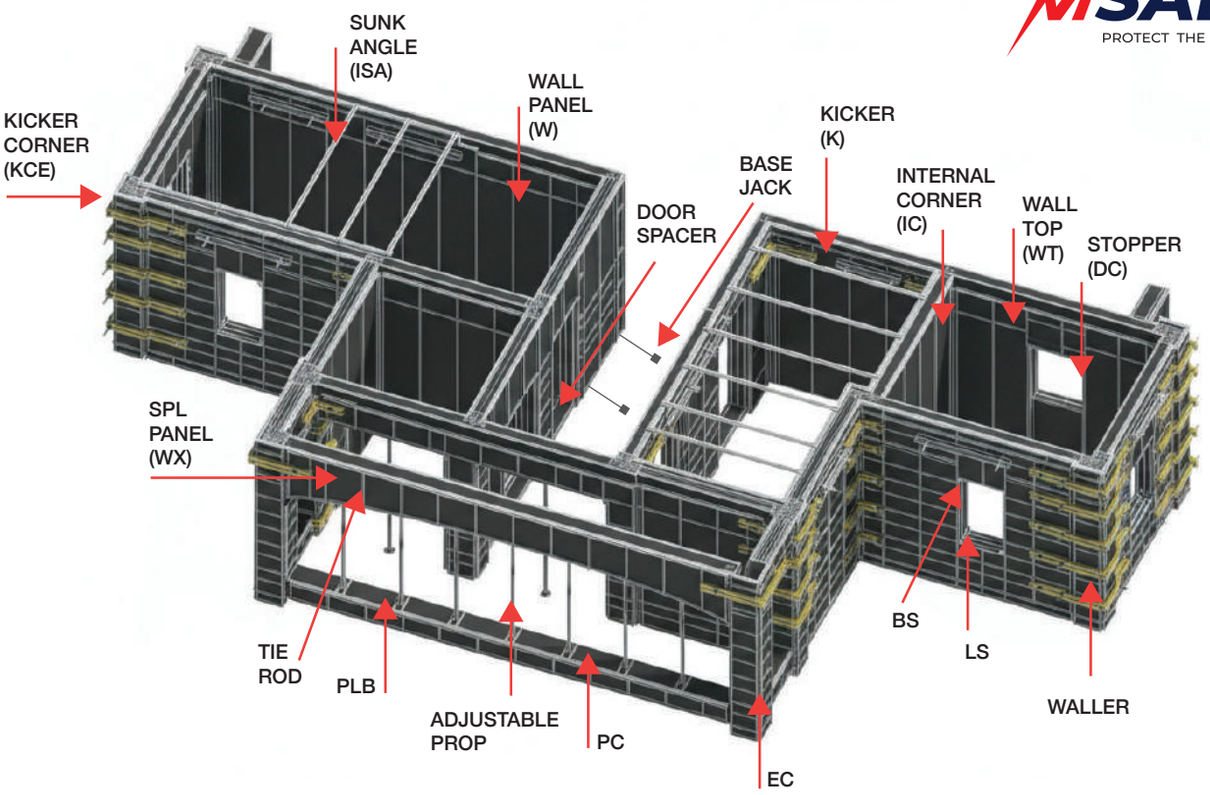
Internal Corner
Used to connect two vertical panels with internal corner.



External Corner Angle
Used to connect two vertical panels with internal corner.



Corner Internal
The SC component forms the horizontal internal corner between wall/beam face and slab face.



SUNK ANGLE (ISA)
WALL PANEL (W)
KICKER CORNER (KCE)
KICKER (K)

Your Safety. Our Priority. Complete Protection for Every Site.

Premium Safety Gear for Construction & Scaffolding Professionals.

On every construction site, safety isn't optional - it's essential. Our high-quality safety kits are designed to protect workers from head to toe, ensuring confidence, comfort, and compliance. Whether you're scaling scaffolding or managing on-ground tasks, our gear keeps your team secure so they can focus on getting the job done.

Safety Jackets

Be Seen. Stay Safe.
High-visibility reflective jackets that ensure workers remain visible in low-light and high-movement zones.

Safety Helmet

Head Protection That Works.
Shock-absorbing, robust helmets engineered to guard against falling objects and accidental impacts.

Safety Gloves

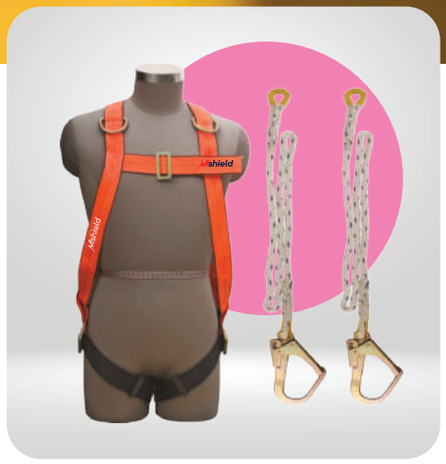
Grip. Comfort. Protection.
Durable gloves designed to withstand tough surfaces, offering excellent grip and hand safety during daily site operations.

Safety Shoes

Strong Steps Start Here.
Steel-toe, anti-slip shoes built for stability and impact protection - perfect for rough, high-risk construction environments.

Safety Glasses

Clear Vision. Zero Compromise.
Impact-resistant eyewear that protects against dust, debris, and hazardous particles while ensuring crystal-clear visibility.



Safety Lanyard

Your Lifeline at Heights.
Strong, reliable lanyards designed for scaffolding and elevated tasks, ensuring secure anchorage and fall protection.
